

# DD1 Drum Rotator

The DD1 horizontal drum dispenser is a very versatile product for paying out cable. The unit is primarily designed to enable cable to be dispensed directly from contractors vans, lorry backs or rail carriages but can also be used to pay out cable directly from the floor. For ease of loading a drum onto the DD1 drum dispenser, a simple yet effective extender can be purchased as an option (DD1E). It allows you to locate the spigot in the drum centre whilst the drum is in its vertical position. A further advantage is that it allows multiple drums to be stacked safely

- Heavy duty structure
- Extremely compact and lightweight
- Can be carried with one hand
- Bright zinc plated finish
- Capacity 3000Kg
- Max drum size 2000mm
- 38mm diameter spigot
- Size: 64cm long x 64cm wide x 15cm high
- Weight: 14Kg (17Kg with extender)
